

Color Ink PVC SLEEVE

(Provisional)

Description

COLOR INK PVC SLEEVE are solvent based flexo printing inks, formulated with particular pigments to print on thermoretractable PVC film.

Application

Printing of PVC thermoretractable sleeves. COLOR INK PVC SLEEVE peculiar characteristics are excellent brightness, outstanding printability and good resistance to abrasions.

Handling

Mix well before use.

Dilution can be made with DILUENTE 70/30 (a blend of ethanol and ethylacetate: 70%-30%). The inks are supplied ready to use, but they can be diluted to obtain a better fluidity or to restore the evaporated solvents.

To slow down the evaporation speed (usually in the hot season), we suggest to add 5% of our RITARDANTE C NITRO (100% methoxy propanol).

Packaging

COLOR INK PVC SLEEVE are supplied in 10, 20, 170 kg drums and 500-900 Kg tanks.

Storing

Product must be stored at temperature not higher than 30°C. Product is flammable.

Shelf life is 6 months.

Use within 6 months from production date (unopened and in the original packaging).
